Please join MLC and the German Program for a talk with Joseph Lulka who will share how learning a language helped him advance his career.

Joseph Lulka is an engineer at Mercedes-Benz U.S. International (MBUSI) in Vance. He currently works as a Buildability Engineer in MBUSI's SUV factory, performing root cause analysis to resolve issues affecting vehicles' quality.

He is Chair of the Alabama Germany Partnership's Young Professional Group, which organizes social and professional events to showcase German industry in the state and cultivate cultural understanding between Germans and Alabamians.

Joseph received his B.S. in Mechanical Engineering from the University of Alabama and learned German through an exchange at the Hochschule Esslingen in Germany. He is also fluent in French, having attended high school at the Lycée Pérochon in France.
